Subject: M2 Eggbeater Ant - Info?
To: ham-space@ucsd.edu

Just a quick inquiry to netters who have experience using the M2
"Eggbeater" horizontally-polarized 2 meter antenna.

I'm considering a purchase of this antenna for use on 2m SSB
(omnidirectional) and for the RS satellites, and would like to

decide quickly (within a few days) whether this ANT would be a good addition to my "farm", before the #\$\$%^@*&^% cold weather sets in.

I am aware of the product review on this antenna recently published in QST, but I'd like any additional comments from users of this unusual antenna as to performance, quality of manufacture, benchmark comparisons with other ants, or published figures for gain, directionality, change from horiz. to Circ. polarization, etc.

You may Internet me directly at s1.rsw@isumvs.iastate.edu, or post any comments here if you feel they would be of general interest.

Thanks in advance for your comments.
